1. My script

filename: my_script.js

    a) Create a new file and save it as my_script.js
    b) Write a script that prints "`This is my script`" to the console.

Solution:

```javascript
console.log("This is my script");
```

---

2. Person info

filename: person.js

    a) Create a new file and save it as person.js
    b) Write your name, phone, and address of the console on the same line.

Solution:

```javascript
console.log("Satoshi Nakamoto, 555-555-555, Bitcoin Boulevard");
```

---

3. More person info

filename: person1.js

    a) Write your name, phone, and address in the console on separate lines.

Solution:

```javascript
console.log("Satoshi Nakamoto\n555-555-555\nBitcoin Boulevard");
```

or:

```javascript
console.log("Satoshi Nakamoto");
console.log("555-555-555");
console.log("Bitcoin Boulevard");
```
