14. Text printing with formatting.

Filename: textformat.js

    a) Write a script that contains three different cryptocurrencies contained in three different variables.
    b) Print the cryptocurrencies in 3 different lines.

Solution:

```javascript
var crypto1 = "Bitcoin";
var crypto2 = "Ethereum";
var crypto3 = "Litecoin";

console.log(`Crypto 1: ${crypto1}`);
console.log(`Crypto 2: ${crypto2}`);
console.log(`Crypto 3: ${crypto3}`);
```

15. What is printed?

Which number is printed after the following code snippet is run?

```javascript
console.log(1+5*2);
console.log(2*5+2*2);
console.log(4*5+2*3/2);
```

Solution:

```
11
//Equals 1+ (5 * 2)
14
//Equals (2 * 5) + (2 * 2)
23
//Equals (4 * 5) + ((2 * 3) / 2)
```
